## SUMMARY

I am seeking an entry-level technical position where I can effectively apply my programming skills and technical knowledge to real-world projects, solve challenging problems, collaborate with a dynamic team, and contribute to the success of the company.

## PROJECTS

**Exam Hall Seating Arrangement**

**(HTML, CSS, PHP, MYSQL)**

Created a web-based system to simplify and digitize exam seating arrangements on campus. The system automatically allocates seats, making the process more efficient and accurate.

**Personal Portfolio**

**(React JS)**

Developed a personal portfolio web application using React to showcase skills, projects, and achievements in a visually appealing and interactive way.

**Heart Disease Prediction**

**(Machine Learning)**

Developed a machine learning-based system to predict heart disease, aiming to improve predictive accuracy, enhance patient outcomes, and reduce healthcare burdens.

**Ecommerce Website**

**(Mern stack)**

Developed a web-based eCommerce application that allows users to browse products, place orders, and track deliveries. The system includes an admin panel for managing inventory and order processing.

## EDUCATION

**MCA  Computer Applications - 8.39**                                 **2023 - 2025**

Kongu Engineering College , Perundurai

**B.Sc. Mathematics - 87%**                                          **2019 - 2022**

Kongu College of Arts & Science , Karur

## CERTIFICATIONS

- Java Concepts and Database Management System (Infosys Springboard)
